EDUCATION

University of Wisconsin-Madison **Madison, WI**
Bachelor of Science in Computer Science, Minors in Economics, Mathematics, and Statistics *May 2026*
Key Coursework: Algorithms, Combinatorics, Cryptography, Software Engineering, Econometrics, Applied Regression Analysis

EXPERIENCE

Software Engineer, Vital Signs | Visa **Denver, CO**
VisaNet uptime, reliability, and observability *June 2026 - Present*
- Deployed a Model Context Protocol (MCP) integration giving VisaNet-dependent teams access to uptime, latency spikes, and predictive downtime/latency data through authenticated, permission-controlled, read-only tools with segmented visibility.
- Upgraded 20+ applications to Java 25 and tuned garbage collection and JVM/Spring Boot settings, delivering a 10% production performance improvement in batch page processing and alerts.

AI Analyst | DataAnnotation **Remote**
LLM evaluation, structured criteria, and prompt design *June 2025 - Present*
- Build Rust, TypeScript, and C++ testbeds to evaluate LLM features; assess factuality, relevance, and reasoning against structured criteria for RLHF and fine-tuning workflows.
- Compare models, MCP integrations, and prompt variants through A/B tests to identify stronger-performing configurations.

Software Engineer Intern | TruStage **Madison, WI**
Cloud automation, APIs, and internal LLM security *June - August 2025*
- Refactored Azure DevOps YAML pipelines with cross-functional teams to streamline delivery and accelerate feature releases.
- Architected a C#/.NET microservice API enabling on-call engineers to interact with Azure Service Bus and Blob Storage.
- Built a Python sensitive-data detection tool to strengthen internal LLM security practices and compliance.

Software Engineer Intern | Pharus.ai **Chicago, IL**
Generating business intelligence with artificial intelligence *January - May 2025*
- Delivered a customer-facing KPI chatbot using MCP and automated data preparation with Google Apps Script and Gemini.
- Designed and tested BigQuery SQL schemas and ETL pipelines to automate reporting across business services.

Software Engineer Intern | Magnet-Schultz of America Inc. **Chicago, IL**
Network infrastructure, cybersecurity, and systems administration *May - August 2024*
- Secured 15 servers using host isolation, IOC hunts, artifact cleanup, and SPF/DKIM/DMARC email authentication.
- Provisioned AD DS and Exchange; managed GPOs, file access, WSUS patching, L2/L3 diagrams, and switch-stack planning.

PROJECTS

Co-founder & CTO | Openfloor opnflr.com
Human-demonstration data infrastructure for physical AI and robotics *June 2026 - Present*
- Built a Swift/ARKit iPhone capture app recording RGB video, LiDAR depth/confidence, camera poses and intrinsics with shared timestamps; added resumable TUS uploads and recovery from interrupted recordings.
- Engineered a Python hand-reconstruction pipeline integrating MediaPipe, SAM2 segmentation and HaMeR/MANO mesh fitting, with temporal tracking, depth anchoring, reprojection checks and checkpointed GPU processing.
- Built a Python/ManiSkill simulated-robot evaluator integrating Qwen and Show-Harness to compare video-only, spatial and annotated demonstration inputs; implemented matched trials, robot replay and bounded GPU execution.

Lead Developer | Holos Industry Capstone holos.io
Physical AI capture enrichment, visualization, and inverse kinematics *January - May 2026*
- Led development on a five-person capstone team; built a Three.js/MuJoCo WebAssembly viewer with synchronized video and spatial tracking, plus a Python/Gemini capture-enrichment pipeline.
- Built an analytical inverse kinematics solver aligning Apple Vision Pro and MuJoCo coordinates, with measured elbow guidance, joint limits, smoothing, and safeguards for missing tracking data.
- Presented to UW-Madison CDIS; delivered features implemented by Holos and showcased to Samsung and NVIDIA.

SKILLS

Certifications: AWS Certified Cloud Practitioner (CCP)
Languages: Python, TypeScript/JavaScript, Java, C#, C++, SQL, Go, Rust
Frameworks and AI: React, Next.js, Node.js, Three.js, MuJoCo, .NET, Spring Boot, MCP, Gemini API
Cloud and Data: AWS, GCP (BigQuery), Azure DevOps, Cloudflare, PostgreSQL, Docker, Kubernetes, Git, CI/CD
Leadership: President, Acacia Fraternity; Technical Recruiter, TruStage; COO, MadCloud; Eagle Scout
